CYBERFORCE® COMPETITION

November 3-4, 2023

Overview

The 2023 CyberForce Competition® is back in-person! The competition will welcome back teams to one in-person location just outside the Chicagoland area. The competition will remain university driven teams of 4-6 members. Collegiate students will engage in energy-focused activities centered on cybersecurity methods, practices, strategy, policy, and ethics, all while defending their network against red team attacks. With rapidly growing enthusiasm from academia, industry, and government alike, our next event will host over 100 teams nationwide.

Student Benefits

- Networking with peers and faculty from other institutions
- Contact with prospective employers
- Mentorship from industry and national lab staff
- Hands-on learning in industrial control systems
- Exposure to real-world cyber problems in a simulated environment
- Access to information about other cyber training and efforts
- Receive a competition proficiency report mapped to the NIST NICE Framework
