

U.S. DEPARTMENT OF ENERGY'S

CONQUER THE HILL

COMMAND EDITION

PART OF THE CYBERFORCE® PROGRAM

Overview

Conquer the Hill: Command is the newest of the collegiate-level, individual competitions within the CyberForce® Program. Command is a task-based competition that will put your technical skills to the test. There will be two difficulty levels for Command: Difficulty 1 (Beginner) and Difficulty 2 (Advanced). Command will provide participants hands-on experience performing real-world tasks for an IT administrator and security professional position. Whether you are passionate about a profession in IT, protecting systems from malicious attacks, or just getting started in this field, Command will help you get some initial experience to support you on your journey!

Student Benefits

- Targeted training on information technology skill sets that employers are seeking
- Task based step-by-step learning
- Compete at your pace
- Mentorship national lab staff
- Grow with the program
- Access your learning through essential building blocks provided in the CyberForce Program
